B2H2 SOLUTIONS INDIA PVT. LTD. SERVICES, TERMS AND CONDITIONS:
(Koha ILS Cloud Hosting)

- ✓ B2H2 SOLUTIONS INDIA PVT. LTD. **KOHA CLOUD** Hybrid Solution is based on the latest Koha ILS version 21.11.03 and above. Its best feature is that it aggregates the features of an ILS along with that of an Institutional Repository (IR) just like DSpace / Fedora / E-Prints / GSDL etc. However, its biggest advantage comes from the fact that user does not have to maintain **two** separate stacks of hardware and software that essentially do not talk to one another. Not only does this helps to save and better utilization of library funds, it brings everything into a **single window** and thereby makes it easy for both the library personnel as well as users to use and manage.1 As a hosted solution, the headaches of maintaining the system and the hardware is no longer with the institution, with 24/7 access with 99.99% uptime assurance. The use of well documented open data standards and APIs ensure that the customer's entire data is always available to the client just a download away in a completely vendor neutral manner at all time. From ensuring a better RoI (return on investment) to faster access to online as well as physical materials and resources, the Koha IR is the solution to go for to bring in cutting edge library services to your institution.
- ✓ B2H2 SOLUTIONS INDIA PVT. LTD. cloud hosted Koha ILS based on Koha Integrated Library System comes with the features as listed in this document. This document defines the precise service parameters as included in your package. The
